

Milan Aleksić

Last updated: 13/04/2025

Personal

Born on 21/12/1983, Smederevo (Serbia), living in Koekelberg (Belgium) since 2011. I have dual citizenship of Belgium and Serbia.

My website is aleksic.dev, email is milan@aleksic.dev and Bluesky account is: aleksic.dev. I am fairly active on github.com/milanaleksic. I also have a [LinkedIn account](#) if you'd like to connect with me.

Education & spoken languages

Dipl. Ing. Computer Science & Engineering (2008) from *University of Belgrade* (Serbia), Faculty of Electrical Engineering (ETF). "NARIC – Vlaanderen" [recognized my diploma as M.Sc.](#)

I can speak in the following languages: **Serbian** (mother tongue), **English** (fluent), **Dutch** (C1 Effectiveness 1), **French** (A2, basic level)

Keywords

Java, Go, AWS, Python, PostgreSQL, MySQL

Experience

[2020-...] Senior Software Engineer @ Soda (Brussels, Belgium)

soda.io Cloud Backend founding engineer (since late spring 2025 member of the platform "Foundational" team) - Programming languages: (mostly) Java, Python, Go - I was one of the first ("founding") engineers so I witnessed all the data quality product pivots & surprising platform usage patterns; I became the company backend & MySQL perf guy and introduced discipline in performance analysis and monitoring which helped the company grow 100x in customers and revenue over 5 years without high-profile incidents or downtime of the Soda Cloud product

I made an internal tool (**dogo**) for DevOps tasks: feature flip management, backend runtime reconfiguration, deep incident analysis, prod environment access authz - v1 in Python, v2 in Go (using Soda Cloud backend/AWS/Okta/Datadog APIs, SQLite, Perfetto)

Broad exposure to data sources while helping bootstrap **Soda SQL**: PostgreSQL, Redshift, Athena, Spark

[2017-2020] Expert Software Engineer @ TomTom (Ghent, Belgium)

CCE Team Feature development and maintenance of various core systems and applications in *MPU Core Coverage Creation & Extension* team

Projects:

- *MLF library*: authored code-generated Java wrapper around GDAL OpenFileGDB (later extended to PostGIS and GeoPackage).
 - Custom ANTLR grammar for extended validation, Python/Markdown doc generator
- *Sinatra*: Led migration of a complex process into AWS for GIS source data digestion
 - PostgreSQL RDS, Spring Boot 2, SQS, ECS, Terraform, Vue.js
- *Pupin*: created machine learning cloud service for data classification (plural junctions problem)
 - Training: PostGIS, Python, Scikit-Learn, XGBoost, (Geo)Pandas, Jupyter
 - Online+Batch prediction: Terraform / AWS ECS, Spring Boot 2, XGBoost, REST
- *Dumbo*: migration of internal heavily used batch processing tool into the cloud
 - AWS Batch, ECS, PostgreSQL, S3, X-Ray; Spring Boot 2, Terraform, Python, Jenkins

- *Excelsior*: process orchestration service
 - [States Language implementation](#) (spec only), ECS+Lambda, Java 11, Python 3

Hermes team Feature development on new long-term systems and applications in *Hermes* team

Projects:

- *Nozem*: always-up-to-date OpenStreetMap ingestion service into core TomTom data layer
 - Kafka, PostgreSQL, Python, Spring Boot, Jenkins
- *Lego*: automated OpenStreetMap features ingestion
 - Kubernetes on Azure Cloud, Python, Java, QGIS Python plugins

[2013-2017] {Senior, Lead} Software Engineer @ Basware (Aalst, Belgium)

Projects:

- *Basware Network Portal*: Full-stack development role on online and internal services
 - Tech stack: Play2, Scala, Java8, MongoDB, Spring, Chef, Go
 - Rewritten core validation business rules implementation (Java)
- *Basware e-Archiving*: DevOps lead-in-charge and one of lead developers
 - Tech stack: CloudFormation, Jenkins, Bash, AWS CLI
 - Cloud stack: Java Lambda functions, API GW, S3, DynamoDB, SQS, Splunk
- *Norsu* (Groovy, Cucumber, Gradle): Cross-systems end-to-end testing
- Business Metrics dashboards (Akka and Dashing.io)
- Migration of legacy Resin applications to Tomcat cluster
 - Oracle DB, JSP, RMI, Ant, Tomcat, Apache2
- *HAL9000* (Golang): Flowdock bot (CI/CD automation helper for 100+ developers)

Previous work experience

Only the last 10 years are listed in details - let's chat if you want more details about things in this list.

2014: Freelance Consultant (remote) @ Gtech UK (*Brussels, Belgium*)

2011-2013: Software consultant @ Cronos (Belgium) (*Brussels, Belgium*)

2009-2011: Software Engineer II @ Gtech G2 Sports Betting (*Belgrade, Serbia*)

2007-2009: Java Developer @ Arius (*Belgrade, Serbia*)

2006: Intern software developer @ ESAProjekt (*Katowice, Poland*)

Selected open source projects

- [Advent of Code 2023](#) (Zig)
- [Github Helper CLI](#) (Rust, Github API)
 - epic issues dependency graph handling, branch names and other “my flow” helpers
- [Personal Web site](#) (Hugo, Cloudflare Pages)
- [Advent of Code 2018](#) (Go)
- [gomakefiles](#) (Makefile, Bash)
 - Reusable Makefile files which allow cross CI/CD Go compilation with many useful tools
- [Igor](#) (Go Lambda, Vue.js, Google+, CloudFront, Cognito, DynamoDB)
 - “I am away” Flowdock bot, deployed via Semaphore.ci + CloudFormation

Selected closed source personal projects

- Home Laboratory

- Hybrid cluster (aarch64/amd64, debian/ubuntu, RPis/NUC Proxmox, home/Oracle Cloud) connected using Tailscale, and with a Synology NAS.
- Infra as code: Ansible for foundational setup of bare new nodes, HashiCorp Nomad+Consul for container scheduling (40+ services like Gitea, Minecraft, yarr, etc.)
- Monitoring via Grafana, InfluxDB, Loki and Tempo
- Thought Train (Go, PostgreSQL, ANTLR, NATS, Vue.js / htmx, Svelte, Flutter, Bootstrap)
 - Feature-rich web page content extraction & book annotation distributed service
 - Search Query grammar, Pulumi-based AWS cloud setup
 - mobile applications (Android, iOS) and Chrome Extension
- Batler (Go)
 - Telegram bot I use for home automation tasks like turning on/off my workhorse laptop, Windows VM and main notification pipeline
- Novinarnica (Go, Google OAuth, Batler)
 - Content crawler and CBR packager of magazines from www.novinarnica.net

Miscellaneous

Public talks

- (BeScala) [Introducing a reactive Scala-Akka based system in a Java centric company](#) with Jeroen Verellen, 2015
