

# Milan Aleksić

Last updated: 16/04/2025

## Personal

Born on 21/12/1983, Smederevo (Serbia), living in Koekelberg (Belgium) with my wife and children since 2011. I hold dual citizenship of Belgium and Serbia.

My website is [aleksic.dev](https://aleksic.dev), email is [milan@aleksic.dev](mailto:milan@aleksic.dev) and Bluesky account is: [aleksic.dev](https://aleksic.dev). I am fairly active on [github.com/milanaleksic](https://github.com/milanaleksic). My LinkedIn account is [@milanaleksic](#) if you'd like to connect with me.

## Education & spoken languages

Dipl. Ing. Computer Science & Engineering (2008) from the *University of Belgrade* (Serbia), Faculty of Electrical Engineering (ETF). “NARIC – Vlaanderen” [recognized my diploma as M.Sc.](#).

I speak the following languages: **Serbian** (mother tongue), **English** (fluent), **Dutch** (C1 Effectiveness 1), **French** (A2, basic level)

## Keywords

Java, Go, AWS, Python, PostgreSQL, MySQL

## Work experience

### [2020-...] Senior Software Engineer @ Soda (remote; HQ in Brussels, Belgium)

Backend founding engineer of Soda Cloud (since 2025 a member of the Foundation team). Programming languages I used were Java, Python and Go.

Became the company's go-to backend engineer and MySQL performance guy. Helped scale the company 100x in both customers and revenue over 5 years, all without high-profile incidents in the Soda Cloud product.

Had a multi-hat impact on the organization through domain, infrastructure, and system design. Maintainer of the Soda Kubernetes agent, Vault Decrypter, warehouse source preparation, public API, OpenAPI generator, custom DI/DB framework, and several other complex features and mini-services.

Developed an internal platform CLI tool (**dopy** / **dogo**) for automating many painful DevOps tasks. v1 was in Python, v2 in Go (integrating APIs from AWS, Okta, Datadog, Kubernetes, Soda Cloud, using SQLite and Perpetto).

### [2017-2020] Expert Software Engineer @ TomTom (Ghent, Belgium)

#### MPU Core Coverage Creation & Extension Team

- *MLF library*: authored code-generated Java wrapper around GDAL OpenFileGDB (later extended to PostGIS and GeoPackage).
  - Custom ANTLR grammar for extended validation and Python/Markdown doc generator
- *Sinatra*: Led migration of a complex process into AWS for GIS source data digestion
  - PostgreSQL RDS, Spring Boot 2, SQS, ECS, Terraform, Vue.js
- *Pupin*: created machine learning cloud service for data classification (plural junctions problem)
  - Training: PostGIS, Python, Scikit-Learn, XGBoost, (Geo)Pandas, Jupyter
  - Online+Batch prediction: Terraform / AWS ECS, Spring Boot 2, XGBoost
- *Dumbo*: migration of internal heavily used batch processing tool into the cloud
  - AWS Batch, ECS, PostgreSQL, S3, X-Ray; Spring Boot 2, Terraform, Python, Jenkins

## Hermes team

- *Nozem*: always-up-to-date OpenStreetMap ingestion service into core TomTom data layer: Kafka, PostgreSQL, Python, Spring Boot, Jenkins
- *Lego*: automated OpenStreetMap features ingestion: k8s, Python, Java, QGIS plugins

## [2013-2017] {Senior, Lead} Software Engineer @ Basware (Aalst, Belgium)

Projects:

- *Basware Network Portal*: Full-stack development role on online and internal services
  - Tech stack: Play2, Scala, Java8, MongoDB, Spring, Chef, Go
  - Rewritten core validation business rules implementation (Java)
- *Basware e-Archiving*: DevOps lead-in-charge and one of lead developers
  - Tech stack: CloudFormation, Jenkins, Bash, AWS CLI
  - Cloud stack: Java Lambda functions, API GW, S3, DynamoDB, SQS, Splunk
- *Norsu* (Groovy, Cucumber, Gradle): Cross-systems end-to-end testing
- Business Metrics dashboards (Akka and Dashing.io)
- Migration of legacy Resin applications to Tomcat cluster
  - Oracle, JSP, RMI, Ant, Tomcat, Apache2
- *HAL9000* (Go): Flowdock bot (CI/CD automation helper for 100+ developers)

## [2006-2013] Previous work experience

Reach out for a chat if you'd like more details about anything listed here.

**2014**: Freelance Consultant (remote) @ Gtech UK (*Brussels, Belgium*)

**2011-2013**: Software consultant @ Cronos (Belgium) (*Brussels, Belgium*)

**2009-2011**: Software Engineer II @ Gtech G2 Sports Betting (*Belgrade, Serbia*)

**2007-2009**: Java Developer @ Arius (*Belgrade, Serbia*)

**2006**: Intern software developer @ ESAProjekt (*Katowice, Poland*)

## Selected open source projects

- **Advent of Code 2023** (Zig): [github.com/milanaleksic/adventofcode2023](https://github.com/milanaleksic/adventofcode2023)
- **Advent of Code 2018** (Go): [github.com/milanaleksic/adventofcode2018](https://github.com/milanaleksic/adventofcode2018)
- **Personal Web site** (Hugo, Cloudflare Pages): [github.com/milanaleksic/aleksic.dev](https://github.com/milanaleksic/aleksic.dev)

## Selected closed source personal projects

- **Home Laboratory**: Hybrid cluster (ARM/AMD, RPis/NUC, Proxmox/Synology NAS, home/Oracle Cloud) connected via Tailscale. Uses Ansible for setup and Kubernetes (k3s) for container scheduling (40+ services: Gitea, Minecraft, yarr, etc.). Deep monitoring via Grafana Stack and Prometheus. Previously a Nomad cluster, migrated away in 2025.
- **Thought Train** (Go, PostgreSQL, NATS, htmx) My main side project – a distributed service for feature-rich web page content extraction, note-taking, and book annotation. Uses an ANTLR search query grammar, Pulumi AWS, mobile apps (Flutter for Android/iOS), and a Chrome Extension (Svelte).
- **Batler** (Go): Personal Telegram bot used for homelab automation and as a main notification pipeline.
- **Novinarnica** (Go): Content crawler and CBR packager for magazines.
