

Milan Aleksić

Last updated: 28/09/2025

Personal

Born on 21/12/1983, Smederevo (Serbia), living in Koekelberg (Belgium) with my wife and children since 2011. I hold dual citizenship of Belgium and Serbia.

My website is aleksic.dev, email is milan@aleksic.dev and Bluesky account is: [aleksic.dev](#). I am fairly active on github.com/milanaleksić. My LinkedIn account is [@milanaleksić](#) if you'd like to connect with me.

Education & spoken languages

Dipl. Ing. Computer Science & Engineering (2008) from the *University of Belgrade* (Serbia), Faculty of Electrical Engineering (ETF). “NARIC – Vlaanderen” [recognized my diploma as M.Sc..](#)

I speak the following languages: **Serbian** (mother tongue), **English** (fluent), **Dutch** ([C1 Effectiveness 1](#)), **French** (A2, basic level)

Keywords

Java, Go, AWS, Python, PostgreSQL, MySQL

Work experience

[2020-...] Senior Software Engineer @ Soda (remote; HQ in Brussels, Belgium)

Backend founding engineer of Soda, working on Soda Cloud SaaS. Programming languages I used were Java, Python and Go.

I became the company's go-to backend engineer and MySQL performance guy. Helped scale the company 100x in both customers and revenue over 5 years, all without high-profile incidents of the Soda Cloud product.

I had a multi-hat impact on the organization through domain, infrastructure, and system design as well as providing engineering support and coaching. Some of the most prominent backend features I worked on were internal frameworks for authorization, feature gates, notification rules, database, dependency injection, configuration management, OpenAPI code generator, etc. I also participated in the development of other services like Vault Decrypter, Guardian, Soda Kubernetes Agent, etc.

I also envisioned and developed an internal admin & devops CLI tool (`dopy` / `dogo`) for automating many painful DevOps tasks. v1 was in Python, v2 in Go (integrating APIs from AWS, Okta, Datadog, Kubernetes, Soda Cloud Admin API, Github).

[2017-2020] Expert Software Engineer @ TomTom (Ghent, Belgium)

MPU Core Coverage Creation & Extension Team

- *MLF library*: authored code-generated Java wrapper around GDAL OpenFileGDB (later extended to PostGIS and GeoPackage).
 - Custom ANTLR grammar for extended validation and Python/Markdown doc generator
- *Sinatra*: Led migration of a complex process into AWS for GIS source data digestion
 - PostgreSQL RDS, Spring Boot 2, SQS, ECS, Terraform, Vue.js
- *Pupin*: created machine learning cloud service for data classification (plural junctions problem)
 - Training: PostGIS, Python, Scikit-Learn, XGBoost, (Geo)Pandas, Jupyter
 - Online+Batch prediction: Terraform / AWS ECS, Spring Boot 2, XGBoost
- *Dumbo*: migration of internal heavily used batch processing tool into the cloud
 - AWS Batch, ECS, PostgreSQL, S3, X-Ray; Spring Boot 2, Terraform, Python, Jenkins

Hermes team

- *Nozem*: always-up-to-date OpenStreetMap ingestion service into core TomTom data layer: Kafka, PostgreSQL, Python, Spring Boot, Jenkins
- *Lego*: automated OpenStreetMap features ingestion: k8s, Python, Java, QGIS plugins

[2013-2017] {Senior, Lead} Software Engineer @ Basware (Aalst, Belgium)

Projects:

- *Basware Network Portal*: Full-stack development role on online and internal services
 - Tech stack: Play2, Scala, Java8, MongoDB, Spring, Chef, Go
 - Rewritten core validation business rules implementation (Java)
- *Basware e-Archiving*: DevOps lead-in-charge and one of lead developers
 - Tech stack: CloudFormation, Jenkins, Bash, AWS CLI
 - Cloud stack: Java Lambda functions, API GW, S3, DynamoDB, SQS, Splunk
- *Norsu* (Groovy, Cucumber, Gradle): Cross-systems end-to-end testing
- Business Metrics dashboards (Akka and Dashing.io)
- Migration of legacy Resin applications to Tomcat cluster
 - Oracle, JSP, RMI, Ant, Tomcat, Apache2
- *HAL9000* (Go): Flowdock bot (CI/CD automation helper for 100+ developers)

[2006-2013] Previous work experience

Reach out for a chat if you'd like more details about anything listed here.

2014: Freelance Consultant (remote) @ Gtech UK (*Brussels, Belgium*)

2011-2013: Software consultant @ Cronos (Belgium) (*Brussels, Belgium*)

2009-2011: Software Engineer II @ Gtech G2 Sports Betting (*Belgrade, Serbia*)

2007-2009: Java Developer @ Arius (*Belgrade, Serbia*)

2006: Intern software developer @ ESAProjekt (*Katowice, Poland*)

Selected open source projects

- **Advent of Code 2023** (Zig): github.com/milanaleksic/adventofcode2023
- **Advent of Code 2018** (Go): github.com/milanaleksic/adventofcode2018
- **Personal Web site** (Hugo, Cloudflare Pages): github.com/milanaleksic/aleksic.dev

Selected closed source personal projects

- **Home Laboratory**: Hybrid cluster: ARM/AMD, Proxmox LXC/containers, home/Oracle Cloud. Uses Ansible for setup and Kubernetes (k3s) for container scheduling of 40+ services. Deep monitoring via Grafana Stack and Prometheus. Migrated away from Nomad in 2025.
- **Thought Train** (Go, PostgreSQL, NATS, htmx) My main side project – a distributed service for feature-rich web page content extraction, note-taking, and book annotation. Uses an ANTLR search query grammar, R2 as object storage, with mobile apps (Flutter for Android/iOS), and a Chrome Extension (Svelte).
- **Novinarnica** (Go): Content crawler and CBR packager for magazines.
- **kube-home-dns** (Go): k8s controller that is at the same time a home DNS server, a NextDNS forwarder, a Cloudflare DNS record syncer and a Caddy config provider for my k8s-free DMZ ingress
