To: Whom it may concern
From: Igor Tartalja
Subject: Letter of recommendation for the applicant Aleksić Milan
Date: 03/21/2006

The letter of recommendation for Aleksić Milan is based on my impression on the candidate I completed in the school year 2004/2005. I am teaching the subject on *Programming Languages and Methodologies* (3rd year of undergraduate studies at Computer Engineering and Computer Science Department of the Faculty of Electrical Engineering, University of Belgrade). The main emphasize of the course is given to the object-oriented programming concepts and practice, presented through C++, Java, and C# languages. Aleksić exhibited an outstanding understanding of the concepts and extraordinary ability for programming tasks. He was ranked as the **second** one among approximately 270 students attending the course, and his score on the course was 96.3%. His work was continuous and without oscillation during the course. He is very able to solve programming problems in object-oriented languages. Additionally, I know that candidate exhibited very high level of knowledge (marks 9 and 10 of 10) on almost all courses related to computer engineering and computer science at my Department.

In summary, I recommend the applicant Aleksić Milan with great pleasure and without any reservation. If you have additional questions, please feel free to contact me (I suggest by e-mail).

Dr Igor Tartalja
Assistant Professor
Computer Engineering and Computer Science Department
